Since 2008 when Weaver's was founded we had a vision to guide us—the understanding that when God creates trees, he creates masterpieces. So when we use a tree to create fine kitchen or bathroom cabinetry, our desire is to keep that beauty living on for the enjoyment of generations. And just as each tree is different, we also carefully craft and customize each piece of cabinetry to be *exactly* what you want, without compromise. Custom woodworking is our whole focus, so we're passionate about creating cabinets perfect in every way. As years pass, we hope you'll occasionally reflect on the marvel of God's handiwork that's now in your home, and notice each detail of style and function that's been perfectly designed for you. Unique trees, made uniquely yours.

BEADED INSET

While beaded inset cabinets offer only a minor design difference on frames and cabinet doors, the overall effect is stunning.

kitchens

BEADED INSET

Dramatic scrollwork adds an old-world touch to this beaded inset kitchen, made rich and inviting by application of a gorgeous mid-brown stain.

FULL OVERLAY

Full overlay door and drawer fronts cover all but 1/4" of the face frame, creating a unified look. Here, white paint is paired with sleek metal hardware.

STANDARD OVERLAY

Standard overlay doors and drawers cover face frames by 1/2", leaving a 1" reveal. In this kitchen, light stain and dark accents create a striking contrast.

Custom handcrafted wood cabinetry can turn any bathroom into a luxurious spa-like atmosphere, enhancing the user experience and increasing the home's value

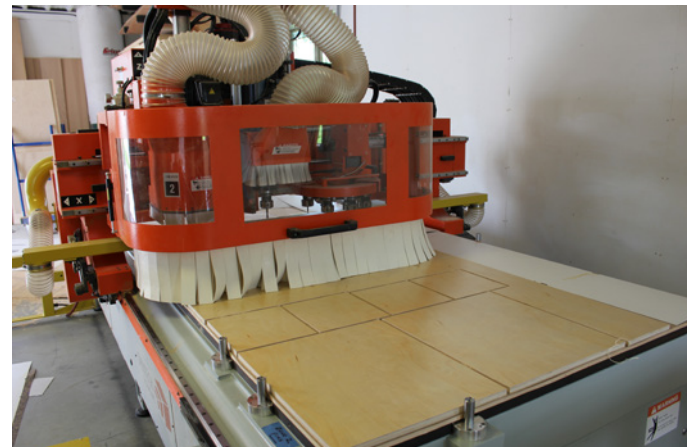

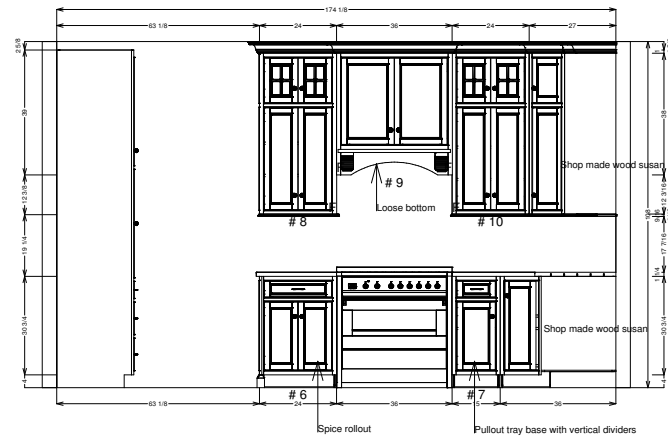

bath

features and options

Lots of styles options plus tons of stain and paint choices put the cabinets you’ve always dreamed of within reach. Choose from beaded inset and full or standard overlay. Then add great functional features like spice racks and trash bins.

IMAGINE

From beginning sketch to finished cabinetry, we work with you to turn your dreams into reality. We monitor quality at every point during the manufacturing and finishing process. If it doesn’t measure up, it gets scrapped.
